Cedar Wood

A circular, half-moon-shaped sauna and steam room with cedar wood and imported tile for a client's gym. 3D renderings were produced to envision the final look and to create this stunning result. The room came completed with advanced accessories including special lighting, WIFI connectivity, an all-glass front, and more.

HOLLYWOOD, FL

We had the privilege of designing and building three Saunas and two steam rooms in the iconic Hard Rock Guitar. These breath taking rooms were built using horizontal cedar, custom benches and skirts, LED bench and ceiling cove lighting plus skylight windows.
